TORCHBEARERS

Established in 2008, in response to the community's need to attract and retain an educated population of young professionals, The *Torchbearers' Leadership Class* is the venue for young professionals to learn, engage and network for enhanced leadership development and increased community understanding and involvement.

TORCHBEARERS

Skills such as team work, leadership development, critical thinking, and personal and professional growth and development are combined with exposure to critical community issues to enhance each members' understanding of themselves and the community. Exposure to issues such as economic development, human services, education, and the role of government are often included within the curriculum. A small group project also provides an opportunity for Torchbearers to network with one another and with community organizations, culminating in a project that impacts the community in a positive way.
